

Participant Access & Invitations

Dashboard Components

The Dashboard is the home base for CIAS. This is the first screen you see when you log in and where all of your interventions live. Each intervention is created as its own **tile** which contains the intervention name, status, number of sessions, dates of creation and last update, and name of the creator. You can export CSV data files, send copies to other CIAS users, and duplicate an intervention on these tiles. **Click on a tile** to access intervention specific content.

Filters
Filters can be toggled to show or hide interventions based on their status

Search by Intervention Name
Filter by name

Intervention Status
Published

Name of Intervention
New e-Intervention

Number of Sessions
Sessions (1)

Quick Links
Click the **three dots** to expand a menu with options to export the data csv, send or duplicate an intervention

Create
Create new interventions

Creation Log
Hover over **Sessions** label to reveal which user created the intervention, when it was created and when it was last updated
