

Finish screen: Dashboard toggle

Direct Participants to Dashboard or Close Session

Overview

A toggle on the Finish screen lets you control what participants see after completing a session in a multi-session intervention.

This allows you to choose whether participants:

- Return to their Intervention Dashboard, or
- Complete the session and close the browser

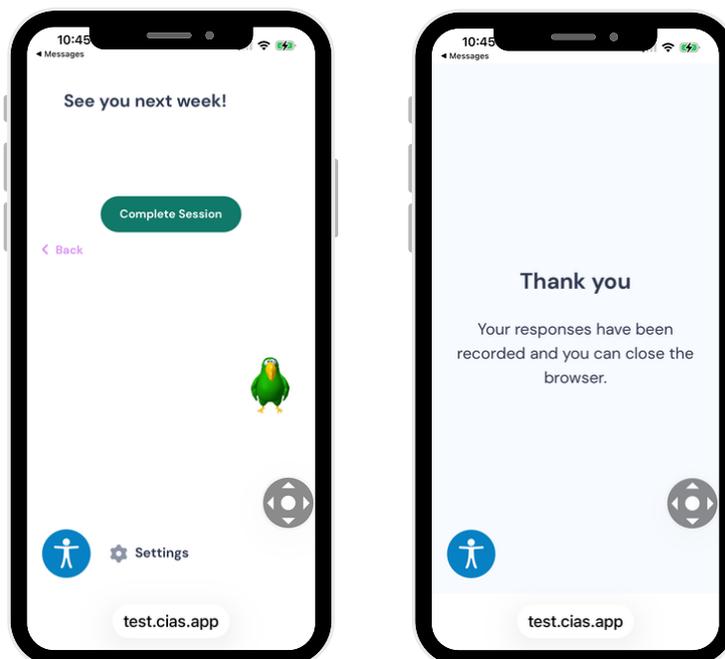

When to use this feature

- Your intervention has multiple sessions
- Participants are
 - Registered account users, or
 - Predefined Participants (PDP)
- You want participants to return to the dashboard to:
 - Download and view reports
 - Access uploaded resources
 - Fill the session again

DASHBOARD IMAGE HERE

Leave this toggle off when

- Your intervention is a single session
- You want the session to end immediately after completion

Finish screen: Dashboard toggle

Let's try it out!

- Open the intervention session
- Select the Finish screen
- Open Screen Details
- Turn 'My Dashboard Button' Toggle on to send participants to their dashboard after completing the session
