

Digital Behavioral Health Interventions Made Easy

CIAS gives you the ability to create and manage multi-session interventions without writing a single line of code. With this robust platform, you can develop and deliver interventions, collect data, and collaborate with colleagues all in one place.

User-Friendly Features

The CIAS platform has a variety of features to support a broad range of interventions and approaches, including:

- Variety of question types to choose from
- An animated narrator to act as a guide
- Automatic translation into over 100 languages
- Tailored reports for participants and clinicians
- Custom SMS messaging
- Branching and Randomization
- Scheduled session sending

Full Version Available for Free*

Our goal is for cost to never be a barrier. All features are available for non-commercial use by researchers at universities or non-profit research institutions.

*A small annual fee will be requested for funded projects.
