

The Dashboard

Dashboard Components

The Dashboard is the home base for CIAS. This is the first screen you see when you log in and where all of your interventions live. Each intervention is created as its own **tile** which contains the intervention name, status, number of sessions, dates of creation and last update, and name of the creator. You can export CSV data files, send copies to other CIAS users, and duplicate an intervention on these tiles. **Click on a tile** to access the intervention content.

Filters
Filters can be applied to show or hide interventions based on their status

- All interventions
- Shared by me
- Shared with me
- Mine only (not shared)

Create
Create new interventions

Collaborate
This purple icon indicates interventions that have collaborators

Creation Log
Hover over **Sessions** label to reveal which user created the intervention, when it was created and when it was last updated

Report a Problem

Search by Intervention Name

Intervention Status

Name of Intervention

Number of Sessions

Quick Links
Click the **three dots** to expand a menu of options

- Translate
- Share Externally
- Duplicate Here
- Archive
- Assign Organization
- Access To CAT-MH™
- Collaborate
